

MATERIAL SAFETY DATA SHEET

NCPV – IRRADIATED VIRUS

Material Safety Data Sheet for: Irradiated SARS-CoV-2

Issued to: Users of UKHSA NCPV Frozen irradiated viruses

Access: Document to be downloaded from Culture Collections website www.culturecollections.org.uk

MATERIAL SAFETY DATA SHEET FOR UKHSA IRRADIATED VIRUSES

Advisory Committee on Dangerous Pathogens (ACDP) Levels 1 or 2

1. Identification of the substance/mixture and of the company/undertaking

Product name: Irradiated SARS-CoV-2

Volume: 0.5 ml per tube

Refer to the relevant data entry on the Culture Collections website: <u>www.culturecollections.org.uk</u>

Contact: Culture Collections UK Health Security Agency Porton Down Salisbury SP4 0JG, UK Telephone (working hours): +44 (0)1980 612512 Telephone (out of hours): +44 (0)1980 612100 www.culturecollections.org.uk/contactus

2. Hazards Identification

Chemical Hazards: None

Biological hazards:

This material has been X-ray irradiated and there is no evidence that it is infectious (see details below). However, as a precaution, this material should be handled at Containment Level 2 by, or under the supervision of, competent personnel who have received appropriate training in safe working practices in microbiology.

After irradiation 10% of the product was inoculated onto Vero E6 cells and passaged three times. No evidence of cytopathic effect or decrease in RT-qPCR Ct value was observed. The product has been handled in a Containment Level 2 (CL2) laboratory so should be used observing standard CL2 laboratory practice.

Health Effects: Not known

Page 2 of 5

Culture Collections, UK Health Security Agency, Porton Down, Salisbury, SP4 0JG, UK T: +44 (0) 1980 612512 www.culturecollections.org.uk/contactus @ECACC @NCTC_3000 @NCPV @theNCPF

Physical Hazards:

It is recommended that persons handling this material should wear a laboratory coat or gown, protective gloves and eye protection (safety glasses). The shipping container contains dry ice which can cause severe cold burns and is an asphyxiant in high concentrations.

3. <u>Composition/information on ingredients</u>

Plastic tube containing frozen irradiated virus.

4. First aid measures

Follow the first aid measures normally applied following exposure to ACDP hazard group 2 organisms.

Eyes: Irrigate with physiological saline or water. Seek medical advice **Skin:** Wash thoroughly with soap and water. Seek medical advice **Ingestion:** Seek medical advice **Inhalation:** Seek medical advice

5. Fire-fighting measures

No specific recommendations

6. Accidental release measures

Local risk assessments should be in place prior to purchasing and handling tubes containing NCPV irradiated viruses.

Personal precautions: Avoid direct contact with the material. Do not open the primary containers unless authorised to do so. Wear a laboratory coat or gown, protective gloves and eye protection (safety glasses).

Environmental precautions: If a spillage occurs, place absorbent material over the spillage and pour over disinfectant. Leave for 30 minutes prior to cleaning and disposal following local procedures. The preferred disinfectant is 10% v/v sodium hypochlorite. This should not be used in combination with other disinfectants. See local risk assessments or contact the manufacturer of the disinfectant for additional information.

7. Handling and storage

Shipping containers contain dry ice so packages should be stored in well ventilated areas.

Store frozen in a laboratory environment which, as defined by national regulations or guidelines, is suitable for handling HG2 microorganisms.

Culture Collections, UK Health Security Agency, Porton Down, Salisbury, SP4 0JG, UK T: +44 (0) 1980 612512 www.culturecollections.org.uk/contactus @ECACC @NCTC_3000 @NCPV @theNCPF

Details of laboratory safety procedures are provided by the Advisory Committee on Dangerous Pathogens (ACDP) in the 2019 publication "Management and operation of microbiological containment laboratories" (<u>https://www.hse.gov.uk/biosafety/management-containment-labs.pdf</u>) and by the Center for Disease Control and Prevention (CDC) in the 2020 publication "Biosafety in Microbiological and Biomedical Laboratories (BMBL)" (<u>www.cdc.gov/biosafety/publications/bmbl5/index.htm</u>).

8. Exposure controls / personal protection

Use good laboratory practice. Wear a laboratory coat or gown, protective gloves and eye protection. Avoid aerosol production and inhalation.

Engineering control measures: As detailed for ACDP 2 Containment Respiratory protection: Avoid aerosol production and inhalation Skin Protection: Wear protective gloves at all times Eye protection: Wear eye protection at all times

9. Physical and chemical properties

| Appearance: | Coloured liquid (typically pink or yellow) |
|------------------------|--|
| State: | Frozen liquid |
| Additional components: | Cell culture medium |
| Other properties: | None |

10. Stability and reactivity

Reactivity data: Not known

Conditions to avoid: Exposure to direct heat

Hazardous decomposition products: Dry ice will sublime to gaseous carbon dioxide.

11. Toxicological information

This material is considered inactivated, however contents must be manipulated inside a suitable laboratory according to local risk assessment.

12. Ecological information

Not applicable

13. Disposal considerations

Disinfection with 10% v/v sodium hypochlorite is recommended prior to disposal. Follow all national, regional and local regulations. The UK Environmental Protection Act 1990 applies.

Page 4 of 5

Culture Collections, UK Health Security Agency, Porton Down, Salisbury, SP4 0JG, UK T: +44 (0) 1980 612512 www.culturecollections.org.uk/contactus @ECACC @NCTC_3000 @NCPV @theNCPF

The disinfected material must be disposed of in accordance with all local and national regulations.

14. <u>Transport information</u>

Additional information arising from the Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations 2007:

UN no.s: 1845

Packing Instruction: PI 650 (UN3373)

Refer to the IATA and ADR Dangerous Goods Regulations for the transport of Infectious substances.

15. <u>Regulatory information</u>

Not applicable

16. Other information

All material may present unknown hazards and should be used with caution. The user should make independent assessments and decisions regarding the completeness of the information based on all sources available. It is recommended that persons using this material are fully acquainted with the hazards/safety in use procedures before handling. This data sheet does not constitute an assessment as required by the Control of Substances Hazardous to Health Regulations 2002 (as amended). The information contained in this publication is provided in good faith and is accurate to the best of our knowledge.
